DIFFERENTIATORS

- We specialize in helping clients anticipate, recognize, assess, and control workplace hazards that can affect the health of employees, customers, communities, and their bottom line.
- Our personnel are experts in understanding local, state, and federal regulations, including OSHA and NIOSH, and multiple other agencies. Certifications include CIH, CSP, CHMM, EIT and PMP.
- Fast and Flexible project scheduling and deployment
- We provide an outstanding customer experience, everyday excellence, and long-lasting relationships.

FEDERAL CLIENTS

PRIVATE CLIENTS

QTS Group helps our customers develop and implement Safety Compliance Programs that are specific to their industry, mitigate unique hazards, and resolve task-specific exposures — all while meeting the requirements of state and federal regulations. The QTS Way is to always deliver more than expected through innovation, ideas, and best practices to help our clients lead their industries in safety, healthy working environments, and environmental stewardship.

We tailor our offering to the individual needs of each client, and we strive to add value to our clients' processes through high quality EHS services. QTS Group combines exceptional customer service with site- and industry-specific expertise to ensure your safety and sustainable environment. Every day we do our best to earn the trust of our valued customers, employees and communities through integrity and compliance, and security.

CORE COMPETENCIES:

INDUSTRIAL HYGIENE AND OCCUPATIONAL HEALTH

- EHS program review and development, specialized training for program and SOP implementation, and assistance with EHS compliance audits.
- CIH guidance, documents preparation, and review.
- Exposure assessments: development of exposure monitoring plans, air monitoring for chemical and particulate contaminants and indoor air quality parameters, noise/sound level monitoring, and mold/bacteria monitoring.
- Exposure assessment of silica, hexavalent chromium, arsenic, heavy metals, radionucleotides; welding fumes. Indoor air quality investigations and assessments.
- CSP support for subcontractor orientation; gap analyses; site safety audits and inspections; and mock OSHA inspections.
- Ergonomic evaluations and assessments. Respiratory protection: qualitative and quantitative fit testing and respirator trainings.
- SME on Corporate and Business Unit Programs for: Process Safety Management, Respiratory Protection, Hexavalent Chromium, Welding, and Thermal Cutting Exposures, and Lead in Construction.
