DIFFERENTIATORS

- We specialize in helping clients anticipate, recognize, assess, and control workplace hazards that can affect the health of employees, customers, communities, and their bottom line.
- Our personnel are experts in understanding local, state, and federal regulations, including OSHA and NIOSH, and multiple other agencies. Certifications include CIH, CSP, PHD., CDGP, CPEA, CHMM, and PMP.
- Fast and Flexible project scheduling and deployment
- We are dedicated to outstanding customer experience, everyday excellence, and long-lasting relationships.
- QTS has Secret Level Facility Clearance (FCL)

FEDERAL CLIENTS

QTS helps our customers develop and implement Safety Compliance Programs that are specific to their industry, mitigate unique hazards, and resolve task-specific exposures — all while meeting the requirements of state and federal regulations. The QTS Way is to always deliver more than expected through innovation, ideas, and best practices to help our clients lead their industries in safety, healthy working environments, and environmental stewardship.

We tailor our offering to the individual needs of each client, and we strive to add value to our clients' processes through high quality EHS services. QTS combines exceptional customer service with site- and industry-specific expertise to ensure your safety and sustainable environment. Every day we do our best to earn the trust of our valued customers, employees and communities through integrity and compliance, privacy and security.

CORE COMPETENCIES:

HEALTH AND SAFETY

- Exposure assessments: development of exposure monitoring plans, air monitoring for chemical and particulate contaminants and indoor air quality parameters, noise/sound level monitoring, and mold/bacteria monitoring — silica, hexavalent chromium, arsenic, heavy metals, radio nucleotides; welding fumes. Indoor air quality investigations and assessments.
- Ergonomic evaluations and risk assessments; Job and task level assessments
- EHS program review, development and implementation, specialized training for program and SOP implementation, and assistance with EHS compliance audits.
- Safety management systems (OHSAS 18001, ISO 45001).
- Respiratory protection: program writing, qualitative and quantitative fit testing, and training.
- Emergency Response/Disaster Planning/Preparedness support.

ENVIRONMENTAL COMPLIANCE

- Environmental Compliance — Permitting and Reporting, NEPA Compliance
- Site Investigations; Vapor Intrusion investigations and assessments
- Per-and Polyfluoroalkyl Substances (PFAS) Support
- Toxicology support — Human and Ecological risk assessment
- Environmental, Health & Safety Compliance Auditing; Staff Outsourcing
- Dangerous Goods Shipping (DOT, IATA, IMDG)
- Resource Conservation & Recovery Act (RCRA); TSCA support
- Spill Prevention, Control, and Countermeasure (SPCC) Planning Hazardous Waste Annual and Biennial Reporting; Environmental Management Systems (ISO 14001) support

CONSTRUCTION SAFETY OVERSIGHT

- Site Safety Officers, EM 385-1-1
- Site Specific Health and Safety Plan Development; Perimeter Air Monitoring
- Contractor orientation; Risk Management surveys; Health and Safety inspections
- Construction site health and safety assessments
- Job Hazard Analysis, Process Hazard Analysis development and review
- Staffing

QTS empowers government agencies and their initiatives through specialized EHS capability in a comprehensive scope of offerings and expertise. Our mission is to help clients protect what matters most in people, assets, and communities, while being budget-conscious stewards of environmental best practices.

AREAS OF EXPERTISE

- Air & Noise Sampling
- Chemical Hazards
- Coal Ash Exposure
- Compliance Audits
- Contractor Oversight
- Dangerous Goods
- EHS Compliance
- Emergency Response
- Environmental Audits
- Environmental Permitting
- Hazardous Waste
- HazOp Analysis
- Health & Safety Planning
- Hexavalent Chromium
- IH & Protocols
- Incident Investigation
- Incident Management
- Lead in Construction
- Medical Waste
- Occupational Safety
- Process Improvement
- Project Management
- Power/Utility Safety
- Quality Audits/Assurance
- Regulatory Inspections
- Respiratory Protection
- Risk Management
- Safety & Health Audits
- Safety Training
- Safety Program Plans
- STEP Data Use/Analysis
- Systems Optimization
- Thermal Cutting Exposures
- Waste Water Permitting
- Welding Exposures

*QTS has presence and services Hawaii and will begin operations in Guam in Q3 of 2024.

Our team of seasoned professionals have an average of 20+ years of experience in aviation/aerospace, automotive, construction, manufacturing, power/utilities, and waste water.

Team credentials include:

- Board Certified Toxicologist (DABT)
- Certified Industrial Hygienists (CIH)
- Certified Safety Professional (CSP)
- Certified Hazardous Materials Manager (CHMM)
- Certified Professional Environmental Auditor (CPEA)
- Certified Dangerous Goods Professional (CDPG)
- Certified Safety & Emergency Manager (CSEM)
- Registered Environmental Manager (REM)
- Project Management Professional (PMP)
- Certified Six Sigma—Black Belt

Our technical support team holds degrees in the environmental or applied sciences, environmental engineering, industrial hygiene, business administration, and occupational therapy from well-established university programs.
